BY VEDEC

German Technology & Italian Design Sensibility

European first-class brand Bianco di Puro specializes in high-grade kitchen appliances. Bianco di Puro's products are designed by Lorenzo Ruggieri & Innocenzo Rilino.

BLDC Motor

Brushless direct current (BLDC) motor is extremely durable. It is free from mechanical wearing and overheating as in AC motor. The motor also creates an extra-long operation life. It ensures long years of professional performance.

5-Year Warranty

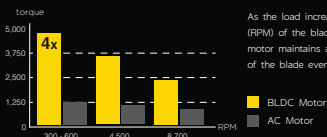

Brake System

The instant brake system makes your power blender more durable. It keeps the bearing always in a good shape.

Ultra-High Torque

BLDC motor boosts 400% torque power than traditional AC power blender. It can easily turn stiff ingredients into extremely fine mixtures.

As the load increases, the number of revolutions (RPM) of the blade decreases. Gusto Pro's BLDC motor maintains a constant number of revolutions of the blade even when blending stiff ingredients.

Efficient Energy

It saves more than 30% of power consumption while comparing with normal AC motor blender.

Smart Corner

The SmartCorner design enhances torsion for a smooth blending effect.

BPA-FREE Tritan™ blending jar

BPA-free Tritan blending jar is suitable for hot and cold ingredients and assure safe food preparation. Tritan is a tough, durable and impact-resistant material.

3-Second Ice Crushing

Strong torque can crush ice in 3 seconds and give ice texture like cotton candy while no other blenders can do.
